

Université de Lorraine publishing network - Roadmap

The UL publishing network was launched in 2022. As of June 2023, it has 30 members, editor-in-chief, assistant editor, scientific and technical information professionals and researchers. It is run by [Éditions de l'Université de Lorraine](#) and the Documentation Department.

Objectives

Its mission is to :

- Share editorial quality standards and professional skills,
- Encourage the transition of UL publications to Open Science,
- Facilitate exchanges between professionals and researchers involved in publishing at UL.

To achieve this, it has 3 main areas of work:

- Information on UL's publishing projects and the national and international challenges of publishing in the context of open science,
- Training in editorial skills by exchanging best practices, sharing documentation and attending training courses,
- Joint projects and widely shared deliverables.

How it works

The network meets 3 or 4 times a year, both face-to-face and remotely.

There are regular exchanges on a dedicated mailing list (reseau-edition-pers@univ-lorraine.fr) and a collaborative workspace on the B'UL.

Join the network

If you are developing or collaborating on a publication project, or working on editorial issues, you are very welcome to join the network.

Are you interested in publishing? Contact us! reseau-edition-pers@univ-lorraine.fr

If you'd like to find out more about how the network works and the role of its members, don't hesitate to ask us your questions or talk directly to one of the current members:
